SOL-M™ Blunt Fill Needle &
SOL-M™ Blunt Fill Needle with 5 micron filter

SOL-M™ Blunt Fill Needle is designed to potentially reduce the risk of needlestick injury while drawing up medication, medication re-constitution. and accessing IV Bags. SOL-M™ Blunt Fill Needles address a wide range of medication preparation needs. The SOL-M™ Blunt Fill Needle provides a substitute for a conventional needle reducing the risk of needle stick injuries.

SOL-M™ Blunt Fill Needle with filter features a 5 micron filter membrane that is designed to prevent glass particles being drawn into the syringe when preparing medications from ampules.

Features & Benefits

- **45°** bevel allows for ease of accessing medication from vials
- **18G** needle allows for draw-up of viscous medications
- **T**raditional hub that fits luer lock or slip tip syringes
- **5 micron** filter - Effecitve filtration of glass particles
  Color coded for identification

Vial use   **Ampule use**
