Building a healthier tomorrow

SOL-CARE®
Luer Lock Safety Syringe

The SOL-CARE™ luer lock safety syringe is designed to prevent needlestick injuries and syringe reuse by retracting the needle into the barrel and snapping off the plunger after injection.

Features

Design for safety
* Fingers stay behind the needle at all times.
* Visual and audible confirmation of safety activation
* Audible click confirms needle completely retracted and securely locked inside the barrel.

Exclusive patented NO GAP design
* Helping prevent accidental activation of the needle retraction mechanism.
* Easier to do reconstitution without accidentally activating the safety mechanism
* Easier to remove air bubbles

Easy of use
* Minimal change in technique.
* Single-handed activation.
* No add-on pieces allows for low angle injections.

Patient care
* Allow change of needles - to avoid "second pierce" causing needle blunt and sharp pain.
* plunger with Special designed tip - reduces the dead space.

Efficient choice
* Retract speed under control - no splatter after activation.
* Luer lock design fits into all standard hypodermic needles.
* Take less space in sharps container, potential to reduce waste disposal cost

Product List

REF	Description	NeedleSize
100075IM	SOL-CARE™ 3ml Luer Lock Safety Syringe With Detachable Needle	21Gx1"
100072IM	SOL-CARE™ 3ml Luer Lock Safety Syringe With Detachable Needle	21Gx1 1/2"
