## The right key for complete protection

The ultimate technology for **dosing caps!**

The main issue of traditional dosing cap systems is the permeability to moisture which alters the chemical-physical features of the active ingredients limiting the shelf-life.

**RewCap™** is an innovative, **patented solution** that creates a **superior barrier against moisture** through an high thickness polyethylene layer at bottom and aluminum seal on the top.

**RewCap™** **increases the stability of active ingredients** with particular reference to the survival of microorganisms.

The practical **RewCap™**, thanks to the **higher capacity allows the administration of active ingredients up to ten times more than our competitors.**

*In a unique cap:*

- ✓ Superior protection against moisture
- ✓ Increased stability of active ingredients
- ✓ High available volume for your formulations

## RewCap™ Exclusive Technology

### How does it work?

Push the top of the cap using the thumb until the complete detachment of the internal cap.

Remove the seal from the cap.

Turn the capsule over to pour the powder contained in it inside the vial.

### Possible application

- Vaginal douches
- Monodose food supplements
- Drops food supplements
- Monodose medical devices
