

The right key for
complete protection

The ultimate technology
for **dosing caps**
in vaginal douches

Vaginal douche with RewCap™ technology

The patented RewCap™ allows to combine a solid phase to the traditional liquid in a **revolutionary and handy way**.

Now it is possible to manufacture **highly innovative vaginal douches** provided with **any kind of solid phase** to mix up to the liquid with particular reference to microorganisms.

Advantages:

- ✓ Handy and simple.
- ✓ Higher capacity for your formulations.
- ✓ Increased stability of active ingredients thanks to its patented technology made up of an high thickness polyethylene layer at bottom and aluminum seal on the top.

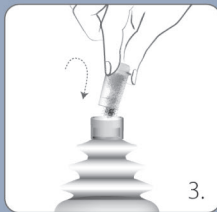

How does it work?

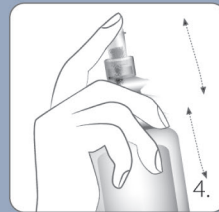

1. Push the top of the cap using the thumb until the complete detachment of the internal cap

2. Remove the seal from the cap

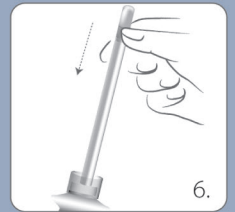

3. Turn the capsule over to pour the powder contained in it inside the bottle

4. Maintaining the cap on the bottle, shake until complete dissolution of the powder

5. Remove the cap

6. Insert the cannula in the bottle
