

## HP-2™

With its easy, single-valve operation, our economical HP-2™ sprayer is popular for dispensing a wide variety of concentrates including lawn/garden chemicals, cleaning solutions and auto/marine care products.

The child-resistant tab-locked valve controls the fan spray chemical and water mixture. It also seals the product in the container for shipment and storage. A hooded design provides consumer protection. Swivel hose and bottle connectors add to the sprayer's convenient operation.

### Highlights

- Unique child-resistant lock tab feature
- Angled dip tube for maximum product use
- Wide range of mix ratios
- Flat fan spray
- Los Angeles county certified anti-siphon system

### APPLICATIONS

The HP-2™ hose end sprayer is ideally suited for applying a wide range of products. By outperforming trigger sprayers, aerosols and other types of hose end sprayers, HP-2™ sprayers offer significant advantages for consumers in the following uses:

#### Lawn & garden

- Fertilizers
- Pest control
- Insecticides

#### Automotive

- Auto washes
- Auto waxes and polishes
- Engine degreaser

#### Industrial

- Equipment cleaners
- Rust and grease removers
- Coatings
- Disinfectants

#### Marine

- Boat cleaners
- Boat waxes and polishes

#### Household

- Patio, deck and pool cleaners
- Fabric cleaners and coatings
- Patio furniture cleaners
