Our aim is to establish Techtron Manufacturing as one of Europe's leading suppliers of reduced environmental impact cleaning and maintenance products. Techtron Manufacturing manufactures, blends and packages liquid based products for the Retail, Industrial, Janitorial and Speciality Chemical markets in a manner that is designed to reduce environmental impact and we work with our customers to assist their compliance with both current and upcoming legislation.

Blending and Manufacture

The versatile configuration of our blending facilities means that we can blend small volumes of under 1,000 litres up to 30 tonnes of production in a single shift. Our variable speed mixers can cope with a wide range of liquid viscosities including concentrates. From concept and formulation through to raw material and consumable sourcing, all with complete traceability, Techtron Manufacturing offers a unique approach and can act as your product development partner.

Filling and Packing

A range of flexible automated and semi-automated filling lines allows Techtron Manufacturing to pack into bottles and containers from less than 50ml up to 1,000 litre IBC's. We are able to fill, cap, label, then box, palletize and shrink wrap a wide range of products. Techtron Manufacturing can undertake any of these services and the design of our operation means that our customers can feed into this process at any stage, offering complete flexibility. We also have capability to utilize new packaging innovations, providing our customers with a potential competitive edge.

Quality Assurance

Quality control and traceability of all ingredients and finished products is ensured with our on-site fully equipped chemical and micro laboratory. Our facility is accredited to the British Retail Consortium's (BRC) quality systems for the manufacture of cleaning products. We have successfully passed audits conducted by a number of blue chip manufacturers and retailers whom we are pleased to count amongst our customers. We are also working towards a wide range of further national and international standards.

Our expertise can help you to boost your "sustainability" credentials

We would be delighted to discuss your requirements however small or large they may be
