

Premier Labellers

The first name in labelling

www.premierlabellers.co.uk

Premier Labellers

Premier Labellers was established in 1994 and has been supplying reliable world class labelling solutions across the world ever since.

During this time we have grown from our humble roots on a farm in Harwich to our new purpose built production facility on Bathside Bay. We take pride in our work and constantly seek to grow our business whilst remaining personable and approachable.

Our solutions have been developed through experience resulting in a comprehensive and versatile range of machines; built to meet the particular needs of each industry.

All our machines are designed and manufactured to British and CE standards, in Britain and built to last; this means that as your business moves forward, we will always be there to support you and your investment.

We have an "open house" policy and welcome all our customers to visit us and develop excellent working relationships with all our staff, as we believe this has been a vital element of our success to date. We don't believe in becoming over corporate and impersonal.

We sincerely hope you find this brochure informative and look forward to working with you.

Since 1994 we have supplied solutions to some of the UK and world leading companies, including:-

English Provender

Brecon Pharmaceuticals

Sara Lee Household

Unilever

DDD

GSK

Boots

Edible Oils

AutoGlym

Johnson & Johnson

Lloyd Maunder

Novartis

Lush

St. Merryn Meats

P&G

Coventry Chemicals

LF Beauty

Northern Foods

Gillette

Bernard Matthews

Aspen Pharmacare

Our Experience is Key

Premier Labellers have been supplying standard and bespoke solutions to a wide range of industries since 1994. Each industry requires specific design features and solutions tailored to its particular needs, which has given Premier Labellers the vital experience needed to be able to offer solutions that really do meet its customers needs.

Cosmetics & Toiletries

An industry that requires extra attention to label placement and overall product appearance. Premier have designed a range of machines that gently handle containers and accurately place labels to within +/- 0.5mm.

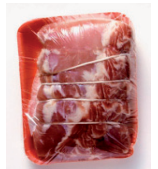

Household & Chemical

A tough industrial environment requiring machinery that can perform well and withstand the aggressive nature of the environment and the 24/7 production schedule.

Meat Packing

An industry that requires robust and versatile solutions to handling all varieties of meat package labelling. Premier have developed an effective and reliable range of fully integrated print and apply labelling systems to suit all applications.

Food & Drink

With ever increasing food and hygiene standards, Premier have developed a range of machines designed to be easily cleanable and capable of being integrated into existing production line systems.

Pharmaceutical & Healthcare

An industry that requires total integrity in packaging. In addition to standard requirements, Premier have developed a range of security and inspection options to guarantee the quality and integrity of the packaging.

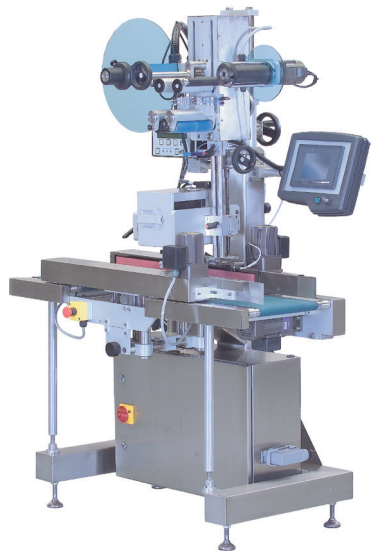

Premier Label Applicators

The Premier 100 range of labelling machines has been specifically designed by Premier Labellers to handle requirements of the modern packaging company, with its ability to handle a wide range of containers and packages.

From a basic single label application to complex integrated catch weight systems the Premier 100 range of applicators can provide a reliable and effective solution to your labelling requirements.

The 100 series applicators can apply labels to most shapes of packs at speeds to match your production. The applicators feature easy to use quick release fittings to enable the label reel to be quickly and easily re-loaded to ensure minimum production down time.

Constructed from stainless steel and aluminium, all Premier applicators are designed to cope with all environments and have proven themselves to be reliable and worthy production workhorses in many factories around the world.

100 Series Applications

- Top label
- Top, side, bottom label
- "C" Wrap
- Thermal transfer print & apply
- End of Line applicators
- FFS Integrated applicator

Premier In-Line Machines

The Premier in-line range of labelling machines has been specifically designed by Premier Labellers to handle all the labelling requirements of the modern packaging company, with its ability to handle a wide range of containers and packages.

Built to GAMP 5 standards you can be assured that your labelling machine is built to the highest standards to guarantee a return on your investment. With modular construction each Premier Labeller has the flexibility to grow as your business does and cope with different styles of packaging as required.

Label Centralisation Technology

The LCT system featured on the new P250 high speed front, back and wraparound labeller is the latest addition to Premier's extensive range of quality labelling solutions and was developed in direct response to demand from brand owners and contract packers to provide a highly accurate and dependable labelling system, especially when labelling glass containers.

LCT is a software based development for the standard Siemens S7 series based PLC control system installed on the new Premier P250 series machine. LCT's unique ability is that it is able to actively measure each container that passes the product sensor and then is able to calculate the exact moment at which to feed each label to ensure each product is labelled absolutely centrally. The LCT system proves its worth when labelling glass as it is able to effectively compensate for the inherent variations in size which in turn opens up a whole new range of possibilities for brand owners seeking to package product in glass containers

- Upto 350 containers per minute output
- 8 axis label head positioning
- Gentle and accurate container handling
- Siemens PLC control
- Optional Inspection & Rejection modules
- 360 degrees control panel operation
- Adjustment scales and dials
- Wide range of container and label sizes

Service & Support

We fully realise that buying a new labelling machine is only the start of a process, not the end. In today's just-in-time manufacturing environment it is essential that we are able to provide our customers with the support they need.

Our team of experienced engineers are on hand to provide support to all our customers from all over the world. From advice on spares and servicing requirements to refurbishments and machine alterations or upgrades our engineers will always be there to support you.

For details of machine upgrades, preventative maintenance contracts, spares kits and all general service enquiries, please call us on +44 (0)1255 553822 or email sales@premierlabellers.co.uk

Spare Parts

We take pride in our quality of construction and have designed our machines to stand the test of time. We also fully understand the environments our machines operate in and recognise the need in many cases for our machines to operate 24 hours a day, 7 days a week

In the event of a component failure we provide a fast and efficient service backed up by technical experience and knowledge. All spare parts are usually available within 24 hours.

We also offer and can recommend spares packages for those companies with their own in-house engineering teams thus keeping down times to a minimum.

Contract Packaging Services

To set up and maintain an in-house manufacturing or packing facility requires significant commitment - premises, staff, machinery, storage, health & safety issues, training and capital investment.

Having done that there is no guarantee that you will have the right equipment to conduct a trial run of a new product, or have the flexibility to cope with the peaks and troughs of the market if you do.

Utilising our own machinery and experience, we are perfectly placed to offer our customers a comprehensive service regardless of the labelling application. With excellent access and ample warehouse space, Premier contract labelling has the capacity to handle any size project.

For more information or assistance on your particular labelling requirements, call us today on +44 1255 553822 or email sales@premierlabellers.co.uk

We have the in-house facilities to handle a wide range of packing options, including:-

- Self-adhesive labelling
- Shrink sleeve labelling
- Re-Labelling
- Promotional Labelling
- Over-labelling
- Creams, gels, scrubs filling
