3. IBR-120L ○●●● + IBR-120CAP ●★

4. IBR-80L ○●●● + IBR-80CAP ●★

Laser etching combined with deposition adds an enhanced luxurious feel.

Please visit our showroom to see the samples shown in the photograph and those with various other decorations.

Laser Etching

■ A laser beam melts or vaporizes material in the irradiated areas to carve a design. Paint or vacuum metalized laser etched surfaces create the feel of an engraved product. The photo shows a surface that has been laser etched and provided with vacuum metallized.

NEW BTA-60K

■ The lid is made with two parts. The top panel is diamond-like-cut. Film or other material can be inserted between the top panel and the screw cap.

(CAP: PP Top panel: AS)

- Numbers in item names serve as a guide for the amount you can fill. Please check the actual articles by conducting tests such as filling and resistance to the contents.
- The capacity and bottle size figures are standard values (before decoration or coloring), which may differ from measurements.
- Please note that the specifications are subject to change.

- For more details on caps and accessories, see the end of Standard catalog 2017.
- Caps and accessories are shown for example purposes only. Some specific bottles or sizes may not be nicely coordinated with some caps and accessories, even though they fit together. Please check the actual articles, or contact us.
