# PosterShop®

Version X10

The success of your shop starts with ONYX PosterShop®. PosterShop® increases your productivity by giving you flexible control over the workflow. PosterShop includes support for two printers with multiple hot folders. Now, you can print directly from your creative applications, drag and drop jobs into any hot folder.

## For First Impressions that Matter

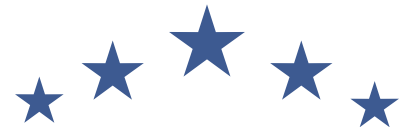

### USER FRIENDLY

Productive interface so a printer operator can quickly and easily drive two printers and many print jobs.

### GROW WITH YOUR BUSINESS

As your business grows, PosterShop makes it easy to drive two printers with a consistent workflow.

### OUTPUT QUALITY

Get outstanding, award-winning print quality and easy media management.

## Top PosterShop Features That Shops Love

- Get a comprehensive set of small-, medium- and large-format drivers with thousands of standard color profiles
- Easy installation for production environments
- Automated and custom nesting tools for maximum media savings
- Maximum workflow efficiency with automated and unattended Print-only and Print-and-Cut workflows
- Faster native PDF, EPS and Raster image processing for quick and reliable reproduction from all creative applications
