ONYX
# *RIPCenter*™ Version X10

Your business starts with RIPCenter.™ RIPCenter™comes with easy-to-use tools that help you create impactful images. RIPCenter can help simplify your everyday workflow, saving you time and money!

Drive Your Business. BIG!

USER FRIENDLY

Getting up to speed and producing professional color is as simple as install, open file, and print.

GROW WITH YOUR BUSINESS

As users grow and businesses become more profitable, RIPCenter makes it easy to upgrade to a higher-end ONYX RIP.
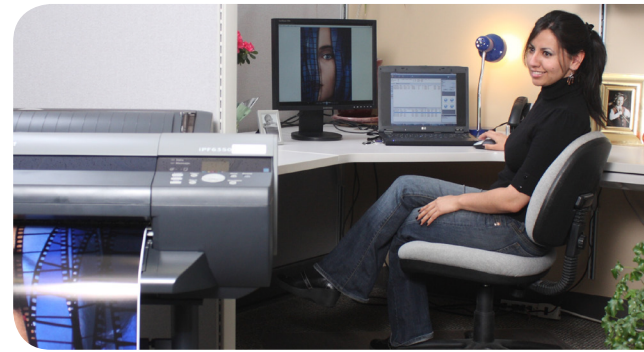

OUTPUT QUALITY

Get the outstanding output and quality, easy re-calibration of media profiles.

Tools That Are Easy To Use

- Easy installation
- Quickly and easily build automated workflow
- Print directly from your PC or Mac creative applications as you would to any desktop printer
- Reduce media waste with automatic nesting
- Visually preview, size, crop, and tile files to avoid costly reprinting
- Smart 16-Bit Processing with ONYX 32-bit Color Engine for superior color output blends and gradients
- Automatic PANTONE®, RAL and HKS Spot Color Matching
- Simple Print-and-Cut Workflow
- New PrintMetryx Job and cost tracking

RIPCenter allows you to have 1 Active Printer.

Print to 1 Aqueous Ink Jet or Entry Level Solvent printer.
