## DATASHEET

Simultaneously supporting white and metallic ink, this high-quality signage printer enables companies to expand their portfolios.

The Epson SureColor SC-S70600 is Epson's first 64-inch (162.6cm) printer to support white and metallic ink simultaneously, enabling creative print makers, specialist sign makers and professional display printers to expand their service portfolios.

High-quality prints are assured with the combination of Epson's UltraChrome GSX Ink and proven Micro Piezo TFP printhead, which delivers clarity, fine detailing and smooth blends at resolutions of up to 1440 x 1440dpi. Along with traditional process colours, the GSX ink set includes light cyan, light magenta and light black ink to generate ultra-smooth tonal gradations and neutral greyscales. GSX also includes a range of special colours such as white, metallic silver, orange and orange plus.

White, metallic and orange inks further boosts performance, versatility and scope of production whether producing simple signage or high-end displays and décor. The advanced formula of our Ultrachrome GSX inks provides excellent durability with lightfastness up to three years outdoors without lamination\*.

### **NEW for 2015 - Orange Plus ink**

This latest addition to our Ultrachrome GSX range enhances the ability to print bright, saturated colours, offering a significant improvement over our existing orange ink.

### **NEW for 2015 - Orange Plus ink**

Users can cost-effectively print vivid colours, solid whites and special metallic effects on clear film, vinyl, canvas, photographic paper and a range of popular banner substrates, all at up to 64-inch (162.6cm) width. Prints are lightfast for up to three years outdoors without lamination\*.

1. Estimate based on Epson test standards: ISO18930 using 100% ink duty. Does not constitute a guarantee or warranty to the longevity of printed images. Longevity of printed images may vary significantly depending on substrates, application, ink duty and environmental conditions. The estimate does not include prints made using Orange, White or Metallic Silver inks. Orange/white/metallic inks will be considerably less durable in outdoor conditions. Epson accepts no liability of any kind for fading or any other change in a print no matter how it is displayed.
