## REPLACEABLE SPONGE TIP TUBE

*replaceable!*

**Replaceable Sponge Tip Tube** solves the hygienic problem of make-up foundation product with sponge applicator.

Optional applicator materials:

- *NBR sponge*
- *Flocking with PU sponge*

Users are able to replace deformed sponge to keep product as hygiene as possible to avoid bacteria contamination.

The premium, soft, and fluffy sponge quality offers gentle touch for delicate and sensitive skin during application.

Optional Tube mechanism:

- ***Built-in Spring design*** enables user to screw cap off and squeeze tube to use product directly.
- ***On/off Valve without spring design*** enables user to open and close tube manually to have precise control and proper dosage.

***No Pintle Design on Cap:***

Unlike conventional sponge tube with pintle on the cap for leakage-proof, the replaceable sponge tip tube design has a special valve system that resolves the problem of sponge that is damaged by pintle without proper capping.
