

STEEL DRUMS

BREATHING
NEW LIFE INTO
PACKAGING

CLOSED & OPEN HEAD DRUMS

Astron Sustainability provides steel drum reconditioning and disposal services for both open head and closed head drums.

Not only does reconditioning extend the lifecycle of our drums without compromising their quality, it also provides a cost-effective and complementary alternative to new packaging. It's the perfect combination of economy and ecology.

NEW DRUMS

Astron offers our clients new closed head and open head drums in addition to polylined drums.

We find for our clients, who do not have a significant new drum demand, the convenience of purchasing new drums through our supply chain is a more practical method.

Our new drums are manufactured by VIP Packaging. VIP Packaging's steel drums can meet the most stringent requirements for products ranging from industrial chemicals through to food and pharmaceuticals.

Designed for applications including

Industrial
Chemicals

Agricultural
Chemicals

Paint, Inks
& Dyes

Acids

Lubricants
& Oils

Hazardous
Waste

RECONDITIONING

Astron provides 205 litre steel drum reconditioning and disposal services, based on approved and environmentally sound processes.

Astron can offer complete site management and innovative systems that can produce a reconditioned steel drum to the highest standards in Australia.

Astron services offers reconditioning services for both Closed Head Drum and Open Head Drums:

Closed Head Drums

- Automated laser guided drum wash
- Progressive draining
- Pre-washing
- Caustic washing
- Steam cleaning
- Drying

Additional services:

- Painting – durable and a variety of colours
- Company logo silk screening
- Shot blasted clean
- Stripping the drum bare to original metal
- Food grade lining optional
- Range of polyethylene drum liners
- Palletising

For steel drums not suited to the reconditioning process, as an EPA and DECC licensed company, we can offer the correct and appropriate disposal of these drums.

These types of drums are put through our thermal oxidation process to remove and neutralise all residue, as well as all external decorations and markings. The drums are then crushed for steel recycling - an environmentally responsible solution.

Liners

Customised new plastic drum liners can be fitted to our open head drums providing insulation to the virgin raw material to be packed. This style of packaging is often used in the surfactant, and powder producing industries.

Our Culture

The Pact Group has a rich and dynamic culture that values agility and innovation. We aim to attract people who respect our values and provides equal opportunity to all.

We expect every member of our staff to act with integrity and respect, to take responsibility for what they do, and to do their jobs to the best of their ability.

Our Values

- We are committed to sustainability and providing an honest, safe and respectful environment
- We walk in our customers' shoes to serve them better
- We pursue opportunities for transformational change
- We are passionate about driving results
- We act with speed and purpose

Astron has processing facilities in Auckland, Melbourne, Sydney, Brisbane and Perth.
