BAKERY CONTAINERS Trays and Packs

PLIX Bakery Containers cater for a diverse range of bakery foods. The PLIX Trays and Packs range offers a variety of designs to meet your food packaging needs.

PLIX Bakery Containers are designed to enhance the presentation of your products by adding value and instant marketing appeal. At the same time, they provide much needed product protection and an attractive yet sturdy means of transport. Innovative construction and design ensure hygienic and convenient packaging for all types of food. A generous range of stock items means that you are assured of a variety of packaging alternatives and a rapid turnaround of your goods.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

- High quality, clear, food grade plastic
- Trays designed for easy overwrapping
- Enhanced appeal and presentation

BURGER PACKS

PLIX Burger Packs come in a variety of packaging designs and sizes to meet your specialised food packaging needs. With superior insulating properties, the packs are perfect for takeaway and prepared meals.

Made from expanded polystyrene these packs ensure foods are packaged in a cost-effective manner. And their thermo-insulation, ensures food will stay hotter and fresher longer. With longer tabs and stronger slots, packages will stay securely closed, which means that your food will be kept at its best until your customer is ready to enjoy it.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

FRESHPAK FOOD TRAYS

The PLIX range of Freshpak Food Trays has been designed for use in the fast food and supermarket industries.

PLIX Freshpak Food Trays are made from expanded polystyrene, are cost-effective, easy to handwrap, freight-efficient and suitable for all applications from meat and deli items to bakery and fresh produce.

A large, curved image showing two black plastic food trays. The top tray contains several large, raw meat steaks with visible marbling. The bottom tray contains several bright red, round tomatoes, some still attached to their green stems. The background is a gradient of blue and grey.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

**HINGED LID FOOD
CONTAINERS
PET Clear food packs**

PLIX PET Clear Food Packs are ideal for cold foods, rolls, croissants, prepared and takeaway meals and packed lunches. Plix Clear Food Packs are manufactured from clear PET plastic, which is highly transparent, so your customers can clearly see the difference.

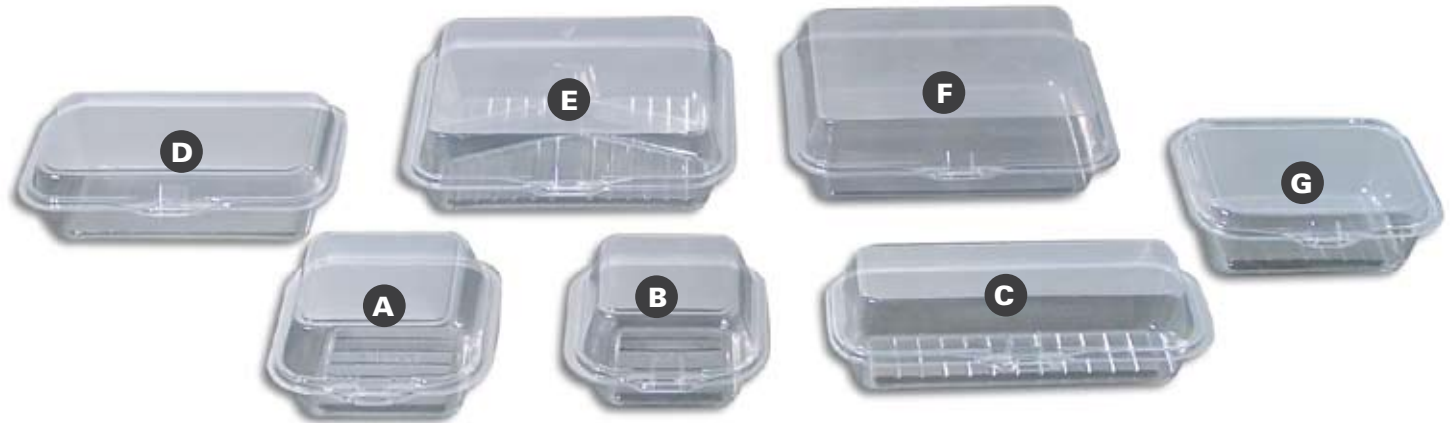

Along with maximum transparency and rigidity, the packs enhance the appeal and presentation of foods. Foods are given an upmarket image while being securely packaged in a sophisticated hinged lid container.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

Plix

MAP BARRIER FOOD TRAYS

PLIX MAP Barrier Food Trays have been designed for meat packer wanting to extend the life of fresh chilled product for distribution to supermarkets and other retail outlets from a central packing facility.

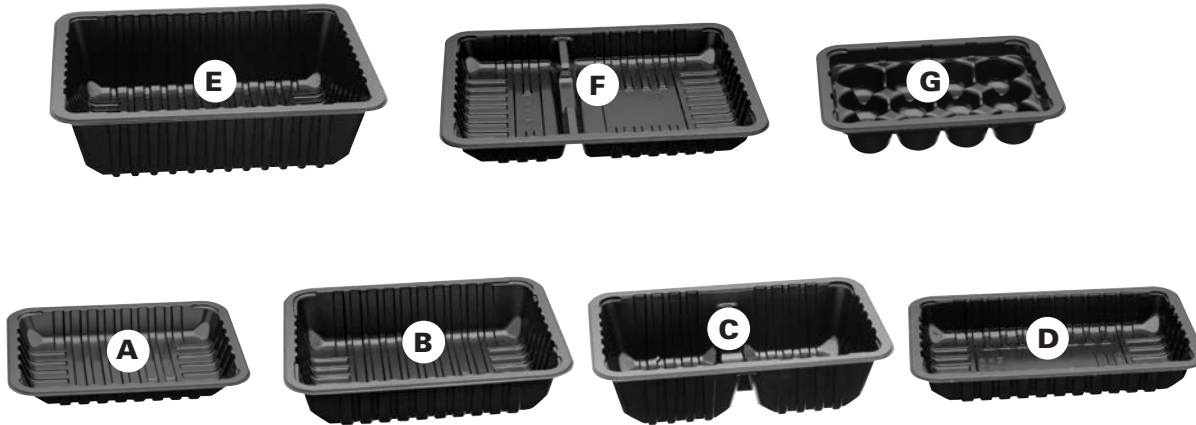

PLIX MAP Barrier Food Trays have been developed to suit the common tooling sizes utilised by most packers of MAP trays. The trays are available in various footprint sizes and depths to meet almost every pack size a supermarket could wish for. Also should the current range of sizes not meet your tray requirements, Alto has in-house product development facilities capable of producing a tray to your exact requirements.

PLIX MAP Barrier Food Trays are made from rigid food grade plastic, with an oxygen barrier lamination. This ensures the modified atmosphere within the pack is maintained during storage, transport and display, thereby extending the life of fresh chilled product. Use of PLIX MAP Barrier Food Trays with an appropriate preservative gas mix, suitable barrier lidding film, and a well-maintained cool chain; will result in an extended product life of 12 to 14 days.

Alto have two ways to get you case-ready. The PLIX MAP Barrier Food Trays deliver an individually packaged case-ready product. However if you are looking for a Total Modified Atmosphere Packing solution, you may wish to choose a case ready Master Pack option, which entails consumer portioned products, in PLIX Meat Trays either stretch wrapped or flow wrapped according to your requirements, and contained within a gas-flushed master pack.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

**PP – MICROWAVEABLE &
CPET – DUAL OVENABLE**

PLIX CPET Trays are a revolutionary concept in food trays. Regardless of the oven type – electric, gas or microwave – CPET Trays can be safely used up to 180 degrees Celsius. And as the trays are able to withstand freezing, they can be used from the freezer, to the oven, and through to the table. These trays are ideally suited for today's high-quality convenience foods.

The benefits of using CPET innovative trays are endless. We recognise the need for individuality in food packaging and possess the facility to custom design, offering a truly versatile and flexible concept to the food industry. CPET Trays can not only withstand the heat of any oventype, but also provide complete meal making convenience. CPET is the answer wherever food is prepared at a central location and distributed to individual homes, airlines or institutions.

PLIX PP Plate is microwaveable only with a clear lid for exceptional presentation. The clear lid needs to be removed prior to heating. The plate is divided into 3 segments to separate the ingredients (meats, vegetable or rice foods). Consumers can enjoy straight from the microwave.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

Plix

POROUS FOOD TRAYS

The PLIX range of Porous Food Trays has been developed to complement the traditional foam tray range and meet the high exudate requirements of meat and poultry processors.

The open cell technology reduces total system costs and improves product presentation by eliminating the need for a separate absorbent pad.

Features of PLIX Porous food Trays include ribless design to maximise internal footprint and improved wall thickness for better performance through automated overwrapping equipment.

Four black plastic trays are shown, each containing a different type of meat or poultry product. The top tray contains several large pieces of meat, possibly lamb chops or pork chops. The second tray contains several large pieces of poultry, likely chicken thighs. The third tray contains several large pieces of sausage. The bottom tray contains a large, flat, rectangular piece of ground meat, possibly beef or pork. The trays are arranged in a descending staircase pattern from top-left to bottom-right.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

SALAD AND DELI PACKS

PLIX Salad and Deli Packs are innovative new product designs from Alto. The Design and construction of the airtight lid ensures that food maintains that 'crisp and fresh' appeal. The Deli Packs are available in small and medium sizes and the unique product design ensures food is packaged to portray an upmarket image. PLIX small Salad Containers are ideal for presenting a bountiful variety of dishes including salads, seafood, chicken, pasta, snacks and desserts.

PLIX Salad Containers are available in medium or large, a separate clip-on lid is common to both bowls. An innovative lift out tray allows for the separation of wet & dry ingredients, prolonging the shelf life of the salad.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

- All-in-one product for a diverse range of cold food applications
- Innovative, unique design ensures upmarket image
- Clear, high quality PET plastic ensures excellent presentation of products

Plix

SANDWICH CONTAINERS

PLIX Sandwich Containers are made from high quality clear, food grade plastic. The hinged lid design offers improved air tightness, rigidity and stability to ensure sandwiches maintain that 'just made' look and maximum customer appeal.

The wide range of innovative designs also fit a variety of sandwiches so that your customers can choose from a maximum variety of foods that are both clean and fresh.

NEW PLIX ECO

PLIX Eco Sandwich Containers go one step further by combining great food appeal with environmental sustainability.

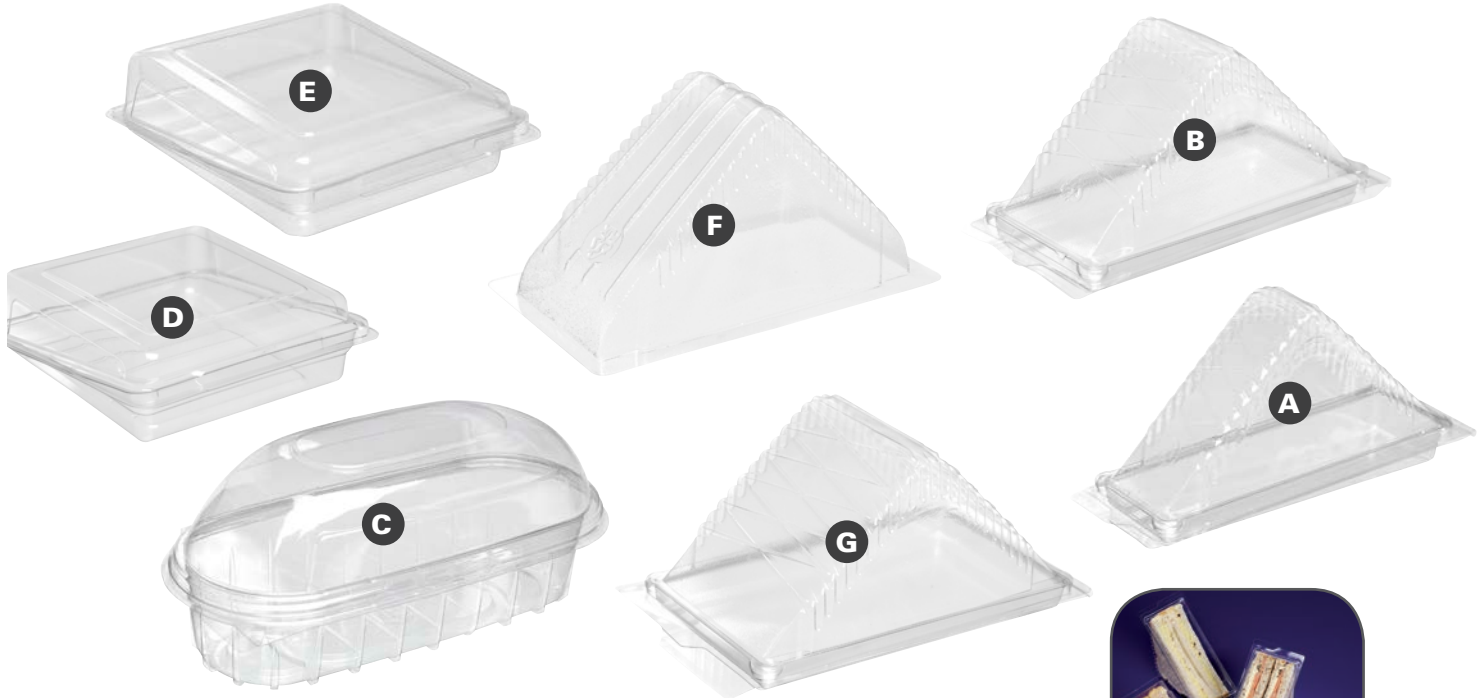

Manufactured from 100% corn, the PLIX Eco range combines all of the benefits of advanced packaging technology with resource responsibility. Biodegradable and compostable, they also use 50% fewer fossil fuels in their manufacture and emit 40% less greenhouse gases.

New PLIX Eco: packaging as natural as the food you sell.

Alto. New Zealand's largest rigid plastics packaging company.

Commitment, Innovation, Solutions and Manufacturing Excellence. These are the values that we take pride in and which have also made Alto the largest and most successful rigid plastic moulding company in New Zealand.

Plix

SHOBOWLS

PLIX Shobowls are the ultimate solution for packaging across a wide range of products. A versatile range of containers, suitable for all fresh food applications, from takeaway salads to deli and bakery items, multiple sizes and one great look.

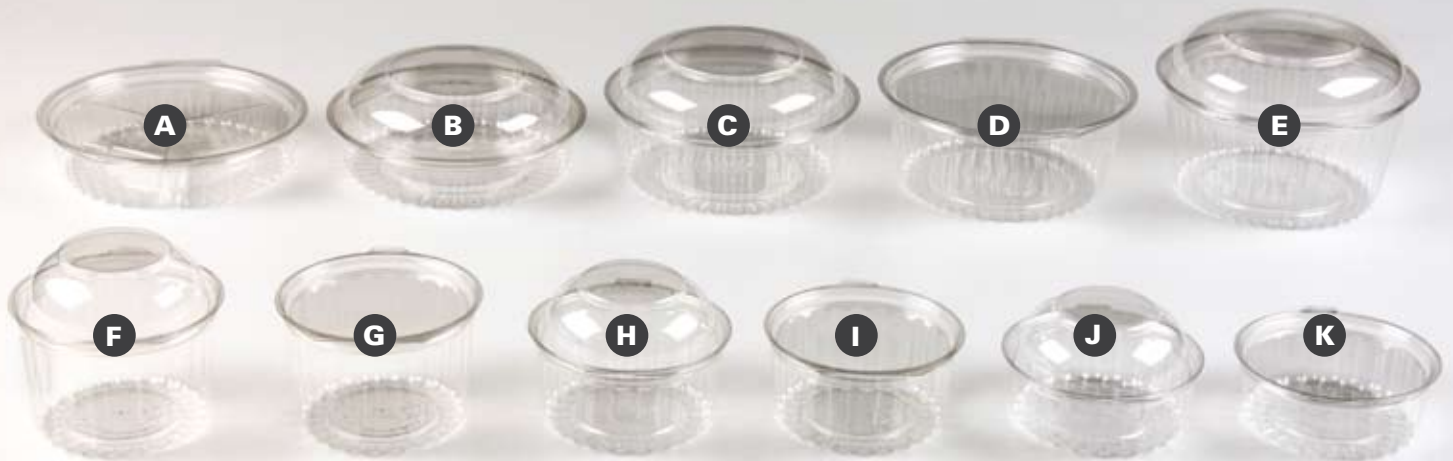

PLIX Shobowls offer domed lids so food can be filled to the top, a great way to attract customers. Or with flat lids to save on space and for ease of stacking product on shelves.

Clear strong PET emphasises the size and freshness of your product allowing the customer to see exactly what they are getting; important in the sale of prepacked foods.

The easy to open and close lid, is tight and secure to prevent spills and mess for a great take home container.

Offer your customers a tamper evident solution, with the application of a label across the front of the closure tabs, ensuring your product is always fresh.

Alto. New Zealand's largest rigid plastics packaging company.
