

# Shrink Bundling Films

At Berry, we offer a wide range of primary, secondary and tertiary packaging films, specializing in clear and printed shrink films.

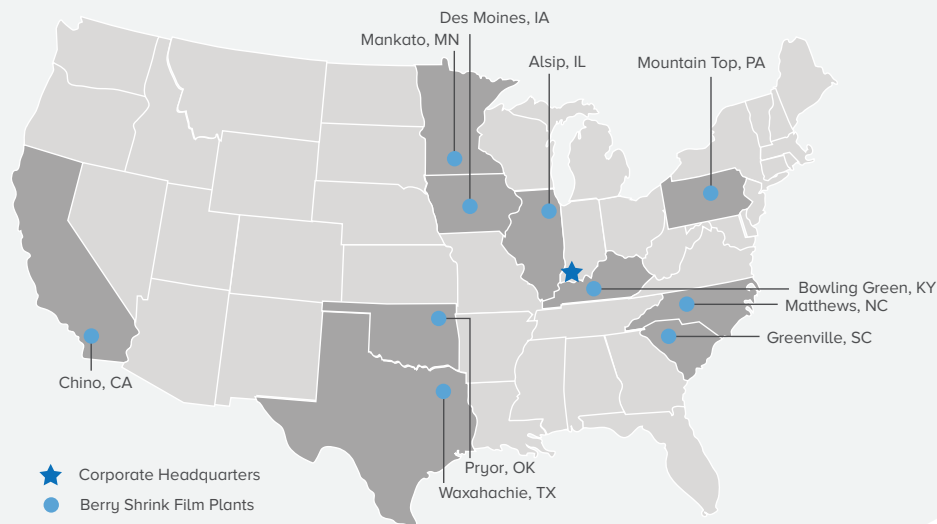

## Advantages and Capabilities

- Mono-layer and co-extruded films for your specific strength, sealing and durability needs
- Performance films engineered for a diverse range of markets, applications and equipment
- Specialized food and beverage films for shelf stable, refrigerated and frozen environments
- Offering print expertise, full service graphic design, and on site technical services

## Sustainable Solutions

- Boost your level of recycled materials with Berry shrink films with Sustane™ recycled polymers
- Reduce your film usage with advanced engineered shrink films designed for lightweighting
- Remove unnecessary packaging components with Berry's corrugate reduction solutions

## Ten Manufacturing Facilities in North America

## Other Unique Capabilities

### Technical Services

- Dedicated team of sales personnel, technical service managers, and customer service representatives
- Remote or on-site assistance available with our technical services team to ensure smooth operations

### Innovation

- Customer-centric innovation center focused on creating solutions for product performance and sustainable materials
- Experienced R&D team specializing in polymer science for flexible packaging applications

### Decoration Services

- Ten-color flexographic printing technology delivers photo-realistic images
- Supports pantone or custom colors to enhance your brand's visibility
- Our Color Management team helps ensure consistent results across product lines
- Highly skilled team offers our customers a one-stop shop for print consultation, art separation, and plate making services
