

VISQUEEN® **SIDE SHEETS**

VISQUEEN SIDE WALL SHEETING

The complete protection for silage

Using Visqueen Side Sheets along with Clingsel and Visqueen Agri-S means complete protection for silage in clamps.

The use of side wall sheets in clamps has been proven to significantly reduce silage spoilage. It will also reduce time spent removing spoilt silage when it comes to feed out.

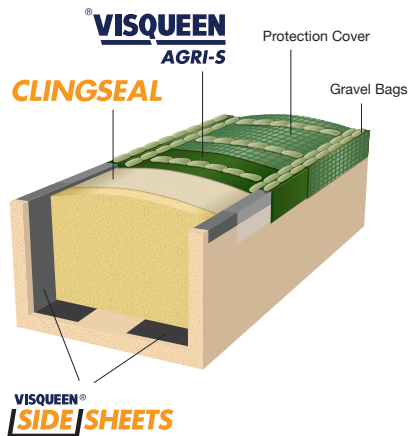

Made from the same material as Visqueen Agri-S, Visqueen Side Sheets are a significantly stronger sheet with excellent tear resistance. Its increased resistance to weathering protects the silage crop for the harshest of weather conditions, protecting your forage.

- Significantly stronger Side Sheets
- Excellent tear resistance
- High resistance to weathering
- Easy to apply and longer lasting
- Significant reduction in side spoilage

VISQUEEN® SIDE SHEETS

Used with Clingseal and Visqueen Agri-S, Visqueen Side Sheets seal the clamp in all directions to ensure significantly less spoilage on every outer surface of the clamp.
