CHANTAL THOMASS & **SELECTIVE LINE**

Charming finery for luxury bottles,
Chantal Thomass collection for Selective Line.

« What I enjoyed about designing bottles
was the chance to explore something I'd never
done before! I believe it's interesting
to take risks, try something new.

The advantage of not being completely aware
of the technicalities is that it gives you more
design freedom and enables you at times
to go beyond the boundaries of creativity. »

INSPIRATIONS & CHALLENGES

« Glass is a very inspiring material. I've always loved glass; I even have a collection of glassware from all periods of history, different bottle shapes... I think no one wants to throw away a pretty bottle, most prefer to keep it and use it again as a kind of decoration. »

« The challenge for Selective Line's Collection was to start with a relatively simple shape then play with the finishing touches, molding patterns here and there either onto or into the glass... With so many ideas each model has a very different look, despite being the same shape in the beginning. »
