

Ideal handles for the building site.

The slender plastic handle has a high vertical and horizontal load-bearing capacity and is perfect for carrying. It can be spray-coloured using the two-component process. Alternatively, metal handles with or without a roller can be attached.

Containers at a glance

Oval	ISO-Vol.	Upper Ø	Height
JETO+ 30	3.1 l	238.1 x 178.1 mm	140 mm
JETO+ 35	3.6 l	238.1 x 178.1 mm	159 mm
JETO+ 55	6.2 l	289 x 210 mm	182 mm
JETO+ 110	11.4 l	345 x 265 mm	218 mm
JETO+ 125 NEW	12.56 l	345 x 265 mm	241 mm
JETO+ 150 NEW	15.6 l	389.3 x 299.3 mm	240 mm
JETO+ 170 NEW	16.4 l	389.35 x 299.35 mm	253 mm
JETO+ 180 NEW	18.14 l	389.3 x 299.3 mm	277 mm
JETO+ 185	18.9 l	380 x 299 mm	298 mm

Round	ISO-Vol.	Upper Ø	Height
JET+ 109	10.8 l	298 mm	210 mm
JET+ 110	11.3 l	290 mm	223 mm
JET+ 125	12.8 l	290 mm	261.3 mm
JET+ 165	16.5 l	323 mm	262.6 mm
JET+ 174 NEW	17.4 l	300 mm	335 mm
JET+ 177	17.35 l	323.5 mm	278 mm
JET+ 180	17.7 l	323 mm	287 mm
JET+ 185	18.9 l	322.5 mm	311.5 mm
JET+ 195	18.8 l	327 mm	309 mm
JET+ 205	20.6 l	323.5 mm	333 mm

More stable. More leak-proof. More secure.

The powerful package with extra performance.

Professionals for colours and construction

The new round JET+ and its oval counterpart JETO+ are perfect for the requirements of the construction chemicals industry. They pack heavy goods such as paints, varnish or plasters securely. The robust, compact design can cope with heavy mechanical loads.

100% leak-proof in the shaker.

Thanks to their innovative lid edge system the JET+ and JETO+ also remain reliably leak-proof in the vibrator. The guarantee for the vibrator is for 3 x 3 minutes. The user will be delighted by a perfect colour mix: The underside of the lid is segment-free, which ensures that no paint residue is deposited there during the vibration.

Stable when transported.

The dimensions of the new Plus series are matched exactly to the europallet, which ensures that the buckets do not protrude over the edge. Adaptive embedded segments in the lid also reliably secure the bucket placed on it. The containers rest securely on the pallet, thus reducing the danger of accidents when transported.

Compact design

The intelligent shape of the new Plus series can withstand extremely heavy mechanical loads. Your product is ideally protected when it is transported and handled.

Lid edge system locking groove

The insertion groove on the edge means that the bucket always remains 100% leak-proof – in the vibrator, too. The guarantee for the vibrator is for 3 x 3 minutes.

323 mm in diameter

The dimensions of the JET+ are ideal for europallets. This prevents the buckets from protruding over the edge and reduces the risk of transport accidents.

Light plastic handle

The slender plastic handle is high-strength and can be sprayed a different colour. Alternatively, the JET+ and JETO+ can be equipped with a metal handle with or without a roller.

Underside of the lid smooth

The underside of the lid contains no segments. No colour pigments can be deposited there during mixing to impair the result.

Lid and bucket nesting

The adaptive embedded segments in the lid reliably secure the bucket placed on top of it.

Decoration options

The bucket can be printed and enhanced using all decoration processes: from the convenient offset method to brilliant In-Mould Labelling – through to sensory effects and watermarks for digital interaction with mobile terminals.
