

## UNISHELL®- Technical Specifications

### Cosmetic

The Unishell® is a unique threaded aluminium closure. Unlike other metal closures, the Unishell® hides its threads on the inside and leaves a smooth, clean look. Even the edge is neatly rolled away.

The Unishell® is widely used for cosmetics and health and beauty products. It is used with cold-fill food products.

**From today Unishell® is available also in Aluminum**

#### Available diameters (mm)

	33	38	40	43	45	48	51	53	56	58	63

400 Finish		•				•		•			
Other Finishes											
Candle Plug						•		•			
Perforated		•				•		•			

- Most of the Unishells are interchangeable with continuous thread closures of the same size since the standard Unishell® works on containers with a 400 finish.
- Tecnocap also produces tall or high Unishells. A tall closure is manufactured with a higher profile to enhance the appearance of the packaged product.
- Further customizing of the closure, such as embossing, special colors, and printing, really sets your products apart from your competition. We can also print a fully readable UPC code on the sidewall.
