

BPPLAS

GENERAL PURPOSE BAG & FILM

Perforated Bag or Sheet In Roll

Perforated bag or sheet in roll is usually preferred for fast and hassle-free packing. Perforated bag or sheet in roll can be used as tote lines and pallet top covers.

Air Cargo Sheet

Air cargo sheet or bags are generally used to secure cargo and luggage and protect them from dust and moisture in airports or forwarding hub.

Builder Film

Builder's film prevents moisture from seeping into the ground during a construction project. They are designed to give permanent moisture protection against ground water penetration into concrete slabs. They can also be used as ground cover membranes over damp sub floors in suspended timber floor construction.

Furniture Cover

Furniture cover protects valuable furniture and fitting such as sofa and mattress from dirt and moisture during storage and transportation.

LDPE, LLDPE & HDPE Bag & Film

BPPLAS produces all types of plastic bags, rolls and sheets for various industrial applications with the best raw materials, latest technology innovation and stringent quality control processes.

Beside stretch and shrink films, we also manufacture perforated bag and sheet in roll, air cargo sheet, builder's film, furniture cover and other plastic bags and films. With this, customers can rest assured that our range of products will be able to meet their demands.
