

Lock-Well®

Material machine concept for Just in Time production of trays from ultra light-weight corrugated paper

Lock-Well®

In cooperation with Schut Systems, PilloPak has developed a unique material / machine packaging concept for the food industry.

The concept consists of a flat die cut sheet of ultra light-weight corrugated paper which is converted with a special carton erector into a ready-to-use tray, with or without compartments.

This tray is both suitable for packaging of biscuits, sweets, chocolates, salted snacks, a.s.o. and for the preparation and bake-off of ovenable products.

The advantages of Lock-Well® :

- Produced out of ultra-lightweight corrugated paper; minimum packaging weight (savings on taxes) together with maximum packaging stability
- Flexible in size and finish, great variety in number of compartments
- By using greaseproof liners Lock-Well® is suitable for both dry and moist foodproducts
- With our special barrier-, silicone- or PET coating it can be used as baking tray (max. 220 C)
- Erection of tray by means of “locking”; **no glue used**; quick change of formats
- Low investment costs, can easily be integrated in existing packaging lines
- Well-tested machine concept, proven reliability
- 100% paper product; so therefore 100% recyclable
