QUALITATIVE INSPECTION

Experience in customer satisfaction

QUALITATIVE INSPECTION

A CUSTOMER CENTRIC APPROACH

Whether it's the safety of the patient or recognition from the consumer, quality is key when it comes to customer's satisfaction.

Société de Service Verriers (SSV) has built its reputation as a preferred partner for the pharmaceutical and cosmetics industries based on this principle.

Situated in the heart of the Glass Valley, a French region globally known for glass containers production, SSV inspects over 150 million glass containers annually. The experience SSV has gained in over 40 years is based on tailoring the work to meet the client's specific objectives; making SSV the indisputable leader in France's glass inspection and services sector.

SSV has positioned itself as a solutions provider, paying special attention to the entire sorting / packaging process, which is determined together with the client in order to meet all of their requirements.

Regardless of the assignment, SSV strives to identify the best possible organisation and the best dimensioning of its teams – a process whose significance and quality monitoring is validated by the audits carried out on site by our clients.

This quality-approach is at the heart of what we do at SSV and makes us the only French sorting service provider certified **ISO 15378**.

OUR EXPERTISE

- ◉ Glass container inspection for the Pharmaceutical and Cosmetic industries
- ◉ Parts assembly (e.g.: bottle + pump + cap)
- ◉ Packing
- ◉ Labelling
- ◉ Calibration
- ◉ Repackaging and re-palletisation

AVAILABILITY OF OPERATORS, MODERN INSTALLATIONS

- ◉ Since 1980
- ◉ 150 employees
2 shifts of 7 hrs, 5 days/week

- ◉ 4 ISO 8 Class Rooms
3 manual inspection lines
1 automated camera sorting line
- ◉ Surface area
Facility : 9,880 m²
Production : 1,000 m²
Warehouse : 1,200 m²

COMPETENCE, DEMAND & INVESTMENTS

REASONS WHY YOU SHOULD TRUST SSV

As a subsidiary of SGD Pharma, a major global player in glass primary packaging for the pharmaceutical industry, SSV has integrated all the requirements of the health and perfume industries. This is how we have earned the trust of the most demanding manufacturers in the overall ecosystem of glass containers production – from the glass product to its plastic accessories used for mouthpieces or steaming, as well as packaging.

All 150 SSV employees - who are true experts in the field of sorting and packing - benefit from continuous training and enable the company to guarantee an excellent reliability of its quality system. A new automated sorting line, which was installed in 2017, is equipped with a group of control machines which were built at the same time

using the latest technology available on the market with specific developments for SSV.

This line has been validated for the detection of a large number of defects using low contrast, including internal contamination, external contamination, glass debris and other defects (stock shattered on the inside, folds, etc.).

Whether it comes to white rooms, manual and double sorting lines or ones with automated cameras, SSV's structures are designed to meet your specific requirements.

Every work station can thus be adapted to modify the illumination angles, make use of either a white or black background to always ensure absolute perfection.
