Borgonovo®
made in Italy

La Vetreria di Borgonovo fu fondata nel 1950.

A quel tempo, tre soci, Francesco Piccioni, Icilio Cantoni e il mastro vetraio toscano Mario Marzini decidono di iniziare la produzione di prodotti in vetro per uso casalingo.

Ebbe inizio, così, una produzione completamente manuale in uno stabilimento di circa 2000 metri quadri.

L'azienda si sviluppò rapidamente, ebbe un buon successo di mercato ed arrivò ad impiegare 700 dipendenti.

A cavallo tra anni '50 e '60, la produzione passò progressivamente da manuale a semiautomatica, fino alla completa automazione, grazie anche ad un considerevole sforzo finanziario.

L'azienda arrivò a produrre un'ampia gamma di articoli per la casa: bicchieri, brocche, posacenere, tazze da birra e contenitori per la conservazione.

Nel 1987, Francesco Piccioni decise di rilevare le quote degli altri soci e di proseguire l'avventura da solo.

Negli anni '90, gli investimenti in attrezzature industriali (con i vari ampliamenti e con l'acquisto di Decover, la superficie coperta dello stabilimento passa dai 12.000 agli attuali 52.000 mq.) e in sviluppo del know-how, hanno portato Vetreria di Borgonovo ad una fase di sviluppo molto veloce, ed a raddoppiare la produzione nel giro di 3 anni.

Si è infatti dato corso ad un ammodernamento dello stabilimento ed alla riqualificazione del personale.

Pur sviluppando una produzione su vasta scala, l'azienda mantiene, ai giorni nostri, un alto standard qualitativo, per andare incontro alle esigenze ed ai gusti dei suoi clienti.

TECNOLOGIA

L'area produttiva si avvale di due modernissimi forni di fusione, uno da 110 e l'altro da 60 tonnellate giornaliere (max) di vetro cavato, che alimentano nove linee produttive.

La fabbrica produce 45000 tonnellate di vetro all'anno, distribuite su 130 milioni di pezzi e su 500 differenti forme, utilizzando un unico tipo di vetro, extra-bianco senza piombo, derivato dalla fusione di sabbia silicea con aggiunta di fondenti, decoloranti e affinati.

Il vetro prodotto risponde completamente alle normative europee ed alle procedure per il rispetto dell'ambiente.

Il vetro utilizzato nel processo produttivo è di tipo extra-bianco (senza piombo), il prodotto viene modellato mediante fasi di pressatura, pressosoffiatura.

PRODOTTI

Gran parte della progettazione e produzione degli articoli di Vetreria di Borgonovo viene concepita ed effettuata tenendo ben presenti le esigenze del canale Ho.Re.Ca. (Hotels, Restaurants & Catering).

Una notevole resistenza, sia meccanica, sia ai molteplici lavaggi, uniti ad una costante ricerca di forme pratiche ed eleganti, sono le peculiarità che contraddistinguono i prodotti Borgonovo.

PRESENTE ED IMMEDIATO FUTURO

Vetreria di Borgonovo continua con la politica degli investimenti e dell'innovazione tecnologica.

Dopo l'ingente sforzo del 2007, quando fu avviata la prima linea per la produzione di vetro soffiato, l'Azienda, preso atto delle tendenze di mercato, ha installato, nel giugno 2010, un'ulteriore linea produttiva dedicata a questa tipologia di articoli.

Questo dovrebbe consentire sia consegne più puntuali degli articoli già esistenti, sia un più rapido sviluppo di nuove linee di articoli. L'obiettivo è quello di offrire una gamma di prodotti sempre più ampia, ad un mercato in espansione, ma anche molto competitivo.

IMPEGNO AMBIENTALE

La Vetreria di Borgonovo è da sempre sensibile alle problematiche ambientali. Seguendo questa linea guida, all'inizio del 2011, l'Azienda ha installato, sui tetti dei propri magazzini, un impianto fotovoltaico per la produzione di energia pulita. Forte di una esposizione di 8000 metri quadri di pannelli solari, questa vera e propria centrale elettrica, della potenza di 966 kW, è in grado di produrre oltre 1,1 GWh/anno, interamente utilizzato per l'attività produttiva.

CERTIFICAZIONI

In un'ottica di miglioramento continuo della Qualità di Processo e con grande attenzione verso le tematiche ambientali, l'Azienda ha di recente conseguito le certificazioni ISO 9001 e ISO 14001, a cura di un prestigioso Ente Certificatore europeo.

L'Azienda, inoltre, mantiene una certificazione metrologica dei propri prodotti recanti linea di stazza, secondo la Direttiva 2004/22 CE del Parlamento Europeo e del Consiglio del 31/03/2004, detta MID.

The Company was founded in 1950 by three partners. Francesco Piccioni, Icilio Cantoni and the Tuscan glass master Mario Marzini to produce glassware for domestic use. A wholly manual production was started in a plant of around 2000 square meters.

The Company grew quickly, enjoying good success in the market and soon came to employ some 700 workers.

Between the mid Fifties and Sixties and as a result of a large financial investment, the production system was transformed from manual to semi-automatic and later on to a complete fully automatic system.

The Company was by now producing a very large range of products for domestic use such as glasses, tumblers, jugs, beer mugs, storage jars etc.

In 1987 F. Piccioni acquired the share holding of his other partners and became sole proprietor.

During the Nineties the company embarked on a new phase of investment in the

latest industrial equipment and acquired the company Decover. The surface of the plant thereby increased from 12,000 square meters to the current 52,000 square meters.

These developments together with the know-how of modern technologies enabled Vetreria di Borgonovo to grow rapidly and in a short period of some three years the production output was doubled. The company is constantly in a process of updating all parts of production and the training of personnel.

Despite the large scale of production Borgonovo has always sought to maintain a high standard of quality in order to meet and satisfy the demands of its customers.

TECHNOLOGY

The production area has two very modern kilns. One with a capacity of producing 110 tons of glass per day and the other some 60 tons.

These two kilns feed nine production lines. The factory produces around 45,000 tons of glass per year. This equates to some 130 million pieces per year spread over 500 different shapes and sizes. The entire production is manufactured using one type of glass which is obtained from the fusion of siliceous sand with the addition of fluxes, bleaches and refiners.

The glass produced fully responds to new European laws and to the procedures for the respect of the environment.

The glass is of extra white sodic-calcic type (lead free) and the products are created through phases of pressing and press-blowing.

PRODUCTS

The majority of the production of Vetreria di Borgonovo is conceived and manufactured to meet the requirements of the Ho.Re.Ca. segment.

The main characteristics of Borgonovo products is their strength to withstand daily and constant usage of many months and years and also of course washing cycles.

PRESENT AND IMMEDIATE FUTURE

Vetreria di Borgonovo is continuing with the policy of investments and technological innovation. After the 2007 considerable effort, when the first blown-glass production line was installed, the Company, being aware of the market trends, has acquired, in June 2010, a new one, to implement the same category of items.

This investment should allow the Company both more punctual deliveries of existing items and a quicker development of new lines. The aim is to offer a wider range of articles to an expanding and very competitive segment of glassware market.

ENVIRONMENTAL COMMITMENT

Vetreria di Borgonovo has always been sensitive towards environmental issues. Following this guideline, since the beginning of 2011, the Company has installed on the roof of his warehouses, a photovoltaic plant for the production of clean energy. With a significant exposure of 8000 square meters of solar panels, this is an authentic power station, with the power of 966 kW, and it can produce more than 1,1 GWh/ per year. The energy produced is totally used for the production process.

CERTIFICATIONS

With the aspiration to a continuous improvement of the Process Quality and paying serious attention to environmental issues, The Company has recently been certified ISO 9001 and ISO 14001 by an eminent European Auditor.

Moreover, The Company maintain the metrological certification of its items with gauge level, according to the European Directive 2004/22/CE (MID).
