How to refill the bottle?

How it works?

A volume of 5.2 ml with approx. 70 sprays, so that you can refresh your fragrance whenever you wish. Caseti Perfume Atomizer is made of high quality zinc alloy and made with SWAROVSKI ELEMENTS, which makes it not just an atomizer but also a companion - for her and for him.

The background of the entire page is a dense, overlapping pattern of spheres. Some spheres are a vibrant purple, while others are a bright, almost white light purple. The spheres have a glossy, reflective surface, with highlights and shadows that give them a three-dimensional appearance. They are scattered across the frame, creating a textured, bubbly effect.
