COMPANY PROFILE

ABOUT US

RTCO-PAK

A packaging solution provider for Sports Nutrition, Nutraceutical, Health, Wellness, Food and Beverage.

Our headquarter located in Shanghai, China with a base of operation in Savanna GA, which including a 100,000 square feet fulfillment warehouse. Our manufacturing base is in Ningbo of Zhejiang Province and features a state of the art factory which cover an in house area of 150,000 square feet, all stages of product development are performed in Zhejiang factory, from molding design to product assembly

RTCO has been ear-marked with a very strong position of high-end sports packaging

On 2009, we are the first company to introduce the Chrome-plating technology into the sport packaging industry until today, RTCO has been always taken the leading position in both quality control and technology innovation!

We excel in doing this thru a team of specialized people that cover the America, Europe, Australia. From LA to Miami, Tampa Pittsburgh, Savanna, Middle Europe and Melbourne with service the Sports Nutrition Nutraceutical, Health, Wellness, Food and Beverage industries.

UNIQUE COMPETITIVENESS

The **SuperGrowPlating**/(SGP) paint technology will maintain the chromed finish never fall off!

The **SuperAnti-Percipitation**/(SAP) soft touch technology will keep you away from the eyesore precipitated spot on your products

The **SuperAnti-Humidity**/(SAH) technology will effectively maintain your products high quality and preserve the product's freshness during the whole life warranty

No matter wherever you are marketing, the **SuperAir-Balance**/(SAB) technology will effectively keep your bottle in shape and prevent the bottle being imploding or paneling.

We welcome you!

RTCO Chrome Canister Sports nutrition packaging series

RTCO has significant market share in the high-end chromed sports nutrition packaging in market of North America. In August of 2016 we opened a fulfillment center in Clearwater/Florida and 2017 another warehouse in Savanna/GA to meet customers' growing demand of our products. The products shown feature a high-quality finish which comes in a variety of color options such as gold, silver, blue, etc. In addition, we also offer a wide-range of sizes from 2 oz. to 270 oz. Customers can have what they want on the production line within 24 hours!

RTCO Chrome Canister Sports nutrition packaging series

FEATURES

- Multiple color options available
- Wide range of sizes with existing mold
- Logo can be customized
- FDA food class plastic material
- All caps equipped with vented induction liner to keep the air pressure balance between the inside and outside

APPLICATION

- Pharmaceutical products
- Sports nutrition products
- Powder, capsules, pills
- Food or organic products

RC 001 Metalized Canister

The chrome plating technology has been widely used on cosmetic industry for many year, so plating on small cosmetic parts like on PP, PMMA, PC, etc; has been very common.

When we start to apply this plating technology on the whole bottle made of HDPE, we have been many times of trying and error, because the paint chemical feature been rejected by the feature of HDPE of which, the chromed finish on most of the canister has been fall off after half year long.

How to solve this? Finally, by the great co-worker from our supplier, we have been developed together the **SGP Technology (SuperGrowPlating) Paint**; this paint will maintain your chrome finish forever as new as the time being produced.

RC 004 (Soft touch) Canister

The Soft Touch Paint Technology will make you products looks super-nice and very high-end; however, due to the chemical feature, most of the soft touch painted product will face the precipitation issues when used for half year long, so the bottle or the caps will have a lot of precipitated spot and the product looks not nice any more and very eyesore!

How to prevent this, then you have to think about our **SAP / (SuperAnti-precipitation)** technology, with this technology, the annoying eyesore precipitated spot will never come back again!

RTCO Scoopless
Sports nutrition packaging series

FEATURES

- Rationing Dosage
- High-efficiency,quite convenient
- Hygiene
- Color can be customized

Application

- Protein Powder
- Any Powder for sports nutrition,food,etc.

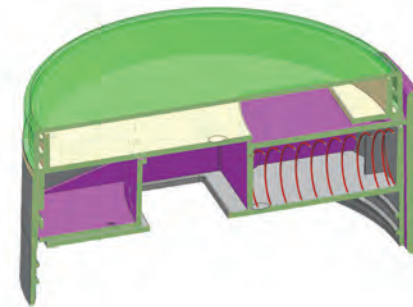

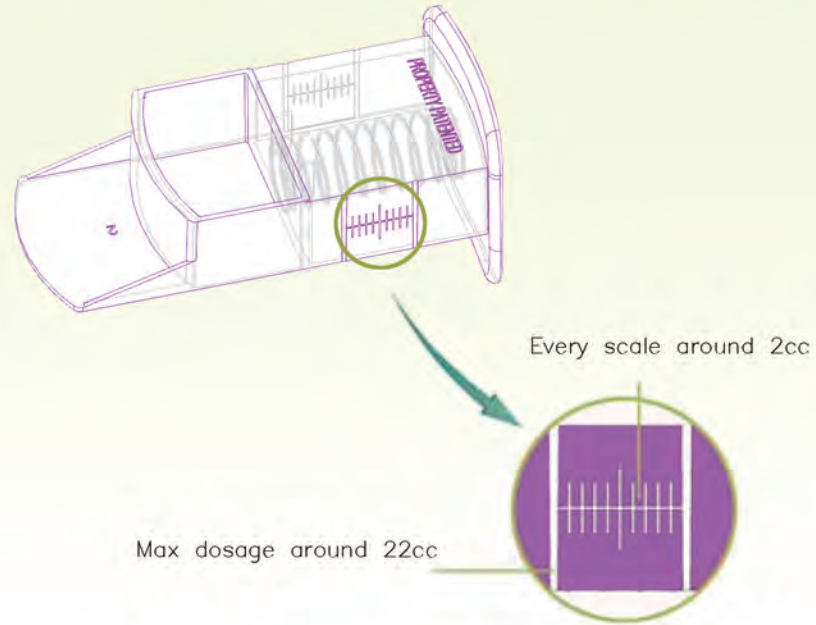

Part	Material
Cap	PP+CHROME
Bottle	HDPE+CHROME

Usually Process:

"Scoopless" Process:

One Stop
Packaging Solution Provider

With the spirit of innovation, **RTCO** technical team constantly makes new design which follows the demand of recent market. The design of "Scoopless" follows a simple concept with key features "Rationing Dosage", "High-efficiency", "Hygiene". The main design is the cap with a rationing groove which functions like a drawer. As a result of this brilliant design, there is no use of scoop at all, and can avoid exposure and contamination of contents when people use every time.

RTCO Foil SealLiner Specification

Sports nutrition packaging series

SAH and SAB Technology

By adopting The SAH/(Super Anti-Humidity) and SAB/(Super Air Balance) technology, our 001FV, 001MV and 001PV series Seals has been proved can be working effectively not only to prevent the bottle imploding or paneling but also to stop the permeable humidity from the air into the sealed bottle!

For protein powder, pre-workout powder, the products, of which the life warranty is sensitive with humidity-permeable, the 001MV and FV seals has been strongly recommended.

For tablet, capsule, pills, of which the products has been packed with a canister which diameter is less than 80mm, the 001NV Seals is recommended.

Seals Naming Rule

Series	Material	Feature	Function	Way of Separation
001-Heat Induction Seal	PS-Paper Sheet	01-PE	MV-Micropore Vented	0-Separated
002-Pressure Sensitive Seal	PSE-Paper Sheet Easy Tear	02-PET	NV-Non-Vented	1-non-separated
	PF-PE Foam	03-Universal	PV-Pinhole Vented	
	PFE-PE Foam Easy Tear		FV-fiber vented	
			LV-Line Vented

Advantages (002 Seals)

- Wide applicable for HDPE/PET/PP/Glass
- Easy tear and easy use/and cheap cost

Disadvantages (002 Seals)

- Air sealing is not good
- Not good for liquid,powder products which requiring long time preservation and life warranty
- Not good for any products which is temperature and humidity sensitive

Advantages (001 Seals)

- Excellent performance for air sealing
- Excellent performance for air balance
- Excellent performance for anti-humidity permeable
- Various spec options for wide applicable with HDPE/PET/PP/Glass,etc

Disadvantages (001 Seals)

- Comparably more cost
- Comparably more sensitive with temperature changes
- Comparably more complicated processing technology
- More machinery required while products being manufacturing

Spec Chart For 001 Series Heat Induction Foil Seals

The spec chart details the layer structure for various 001 series seals. Each model includes a cross-sectional diagram with layers labeled 'a' through 'e' and a circular diagram with a diameter 'd'. The layers typically include PET, Foam, Aluminum foil, and Hot melt adhesive. For example, 001PF-03-MV-1 consists of PET 0.012mm, Foam 0.25mm, Aluminum foil 0.015mm, PET 0.012mm, and Hot melt adhesive 0.1mm. Other models like 001PS-02-MV-0 include Paper board, PET, Foil, and PE Heat Seal layers.

Spec Chart For 002 Series Pressure Sensitive Foam Seals

The spec chart for 002 series seals shows the structure for model 002PF-03-NV-1. It includes a cross-sectional diagram with layers 'a' through 'd' and a circular diagram with diameter 'd'. The layers are PS Foam 0.5mm and Pressure sensitive adhesive 0.01mm.

This section continues the spec chart for 001 series seals. Models include 001PS-03-FV-1 (Paper board, PET, Polyolefin Foam, Foil, PET, PE Heat Seal), 001PSE-01-NV-1 (Paper, AL Foil, PET, PE Heat Seal), and 001PFE-01-NV-1 (PET, Polyolefin Foam, Foil, PET, PE Heat Seal).
