R&D and PRODUCTION CAPACITY

With 30 years of expertise in spray and pump development, we offer one-on-one professional consultation to bring your ideal designs to life.

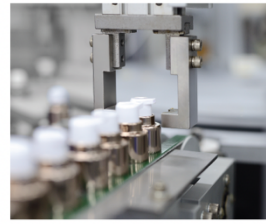

Precision Engineering: Excellence in Every Detail

High-Precision Components :
Utilizing advanced robotic micro-injection molding, we achieve 10µm tolerances for optimal performance, ensuring smooth and consistent dispensing.

AOI Automated Optical Inspection :
Eliminating microscopic defects in key components such as gaskets, our AOI technology guarantees flawless sealing and exceptional quality.

316 Medical-Grade Stainless Steel :
Our core pump components resist corrosion and maintain durability under exposure to acids, alkalis, and alcohols, meeting the highest industry standards.

ISO9001 , ISO14001
SEDEX Member and SMETA Social Responsibility Audit Certified

ABOUT US

We are dedicated to delivering high-precision and consistent products, combined with flexible and responsive customization services, to become your most trusted business partner.

SUNYI PACKAGING INC., founded in 1993 and headquartered in Taichung, Taiwan, specializes in the design and manufacturing of spray and pumps. With over 30 years of professional experience, we focus on serving the skincare, cosmetics, and fragrance markets.

Technical Strength & Flexible Services

With over 40 patented technologies, a professional R&D team and advanced manufacturing facilities, we specialize in the custom design and production of spray and pumps with dosages under 1 cc.

- Low minimum orders starting at 10,000 units
- Quick delivery lead time within 4 weeks

Global Recognition

Our products are exported to over 20 countries worldwide, earning the trust of numerous international renowned brands. We are the technology leader in Taiwan's market and have become Asia's most specialized manufacturer of customized pumps.

20 nations of selling destinations | **30** years of development experience | **40** awarded patents & certifications | **90** person R&D and production team | **100.** international brand partners

QUALITY CONTROL SYSTEM

We firmly believe that "consistently delivering stable and exceptional quality is the foundation for building long-term partnerships with our clients."

Rigorous Production Process to Ensure Stability and Reliability

SUNYI adheres to a strict quality management system, combining professional inspection teams and advanced equipment to ensure that every product meets international standards. The company is ISO 9001 certified for quality management and has successfully passed factory audits conducted by numerous global brands.

All pumps undergo infrared inspection technology throughout the production process, supported by automated assembly machines equipped with material shortage detection systems. Each product is subjected to air-tightness and suction tests and undergoes 100% inspection during the assembly phase. This ensures product stability and reliability, delivering high-quality standards to meet customer needs.

We conduct **16+4+1** testing processes to thoroughly evaluate the performance and durability of our products.

- Dimensional and Functional Testing
- Appearance Inspection
- Environmental Aging Test
- Printing / Coating Test
- Packaging Drop Test

Five-Stage Quality Control

- IOC** Incoming Quality Control
Raw material inspections to ensure top quality
- IPQC** In-Process Quality Control
Regular production checks every two hours
- PQC** Process Quality Control
Quality assurance personnel conduct inspections every four hours
- FQC** Final Quality Control
Finished products meet all release standards
- OQC** Outgoing Quality Control
Shipment inspection ensures product consistency

SUNYI follows international quality standards and has obtained ISO14001 Environmental Management Certification to ensure products remain uncontaminated and customer satisfaction is assured. By incorporating the 6S management approach (Sort, Set in Order, Shine, Standardize, Sustain, and Safety), we effectively enhance workplace efficiency while ensuring employee safety and comfort.

FACTORY ENVIRONMENT

The cleanroom production environment significantly enhances production efficiency, improves product quality, and ensures operational safety

Four Key Points for Cleanroom Management

- **Dedicated Visitor Passage**
Independent visitor routes are set up to prohibit non-production personnel from entering production areas, preventing contamination and ensuring safety
- **Cleanroom Entry Protocol**
Personnel must wear cleanroom attire, shoes, and masks and pass through an air shower to remove dust before entry
- **Component Dust Control**
Cartons are replaced with clean plastic containers, and components pass through air showers before entering the production line
- **Anti-Static Equipment**
Anti-static machines are used to prevent dust and hair from adhering to materials

ESG

Environmental, Social & Governance

"Protecting Employees, Giving Back to Society, and Caring for the Earth" is our mission!

SUNYI's Commitment to Sustainable Development and Responsible Supply Chain Management

For many years, SUNYI has embraced the core values of Corporate Social Responsibility (CSR), actively promoting ESG principles and dedicating itself to sustainable operations and responsible supply chain management. As a Sedex member certified under SMETA, we are committed to ethical procurement and building a transparent, sustainable supply chain. Our efforts aim to achieve a balanced integration of economic, environmental, and social development.

Addressing Climate Change and Environmental Sustainability

Amid global challenges such as climate change and limited resources, we proactively implement the environmental responsibilities of ESG (Environment). Following ISO 14064-1:2018 standards, we have completed internal carbon footprint assessments, addressing both direct greenhouse gas emissions and energy-related indirect emissions.

We are committed to:

- **Reducing Carbon Emissions:**
Enhancing energy efficiency and optimizing equipment to mitigate global warming
- **Promoting Green Transformation:**
Conserving energy and resources to minimize carbon footprints
- **Responsible Production:**
Lowering waste generation and environmental impacts to protect global ecological sustainability

Our Commitment to Sustainability

Providing Eco-Friendly Design Solutions:
Supporting brands in achieving green transformation

Reducing Environmental Pollution in Production:
Optimizing processes to minimize carbon emissions and resource waste

Enhancing Consumer Reusability:
Simplifying recycling processes to increase packaging regeneration value

Achieving Sustainable Environmental Goals:
Committed to sustainability and protecting the Earth's future

OFFERING CUSTOMIZED PUMP SERVICES

Helping Brands Create Unique Product Visuals to Enhance Recognition and Market Competitiveness

Customized Closure Dimensions

In addition to standard neck sizes, we offer custom closure dimensions and develop plastic collar designs to perfectly complement your bottles and overall product aesthetics

Custom Plastic Injection Colors

Based on the Pantone color codes or samples you provide, we deliver precise color matching and production through injection molding to ensure seamless alignment with your brand's visual identity

Customized Aluminum Designs

Beyond standard aluminum closures and collar designs, we offer stamping and custom mold development services to meet unique design requirements, enhancing product texture and quality

Custom Anodized Aluminum Colors

Using your specified metal tones, we apply anodizing treatments to achieve exclusive colors, elevating the luxurious appeal and premium quality of your products

7 DIFFERENT PUMP ENGINES FOR CHOICE

01. Treatment Lotion Pump

Treatment Lotion Pump (Standard) DP

DOSAGES

0.2cc

PRODUCT APPLICATION

Facial Cleanser, Primer, Facial Lotion

PRODUCT FEATURES

- Smooth dispensing, suitable for daily-use products
- Widely applicable to products of various viscosities, ideal for use in skincare products or foundation liquids

Treatment Lotion Pump (Metal-Free Pathway) P01、P015、P02、P05、P10

DOSAGES

0.1cc
0.15cc
0.2cc
0.35cc
0.5cc
1.0cc

PRODUCT APPLICATION

Makeup Remover Gel, Foundation, Face Cream, Hand Wash

PRODUCT FEATURES

- Patented leak-proof structure ensures no leakage during dispensing
- The twist-lock actuator prevents accidental dispensing during transportation, reducing the need for plastic caps and providing an eco-friendly solution
- Metal-Free Pathway prevents chemical reactions between product contents and metal, ensuring no contamination
- Suction-back anti-drip design prevents residue or dripping after use, keeping the actuator clean

Adjustable Dosage Pump MT05

DOSAGES

0.2cc
0.3cc
0.5cc

PRODUCT APPLICATION

Lotion, Cream

PRODUCT FEATURES

- Allowing users to adjust the pump's output volume based on individual needs

02. Mist Spray Pump

Fine Mist Spray Pump S

DOSAGES 0.06cc	PRODUCT APPLICATION Setting Mist Spray, Fragrance PRODUCT FEATURES <ul style="list-style-type: none">• Wide-angle spray• Fine mist evenly adheres to the skin, providing a comfortable experience
--------------------------	--

Ultra Mist Spray Pump S1

DOSAGES 0.12cc	PRODUCT APPLICATION Toner PRODUCT FEATURES <ul style="list-style-type: none">• Wide-angle spray• Ultra-fine mist provides a luxurious and elegant experience for the skin• Spray droplet size: 32 micrometers (µm)
--------------------------	--

Spray Pump DP

DOSAGES 0.2cc	PRODUCT APPLICATION Daily Skincare Products, Sunscreen Spray, Hand Sanitizer Spray, Insect Repellent. PRODUCT FEATURES <ul style="list-style-type: none">• Long-lasting spray• Stable dispensing, suitable for daily-use products• Widely applicable to various products
-------------------------	--

05. Adjustable Dosage Trigger Pump

Adjustable Dosage Trigger Pump MT05-243

DOSAGES 0.25cc 0.5cc	PRODUCT APPLICATION Indoor Fragrance Spray, Fabric Deodorant Spray, Body Deodorant Spray, Sunscreen Spray, Hair Styling Spray, Pet Deodorant Spray PRODUCT FEATURES <ul style="list-style-type: none">• Allowing users to adjust the pump's output volume based on individual needs• Stable atomization, anti-leak, anti-drip design• Ergonomic handle, universal design
-----------------------------------	--

06. Mini Pump

Mini Fragrance Spray Pump M1A

DOSAGES 0.05cc	PRODUCT APPLICATION Perfumes under 15ml, Portable Perfumes, Travel Products, Samples, Gifts. PRODUCT FEATURES <ul style="list-style-type: none">• Mini body with a 6mm cylinder diameter, designed specifically for small-neck bottles• Delivers a gentle, fine mist spray, ensuring a smooth and luxurious user experience• Lightweight design, easy to carry, and suitable for on-the-go usage
--------------------------	--

Mini Lotion Pump M1B

DOSAGES 0.05cc	PRODUCT APPLICATION Eye Gel, Serum PRODUCT FEATURES <ul style="list-style-type: none">• Mini body with a 6mm cylinder diameter, designed specifically for small-neck bottles• Smooth actuation, engineered for effortless pumping, making it suitable for delicate formulations
--------------------------	--

03. Airless Pump

Airless Pump AR01·AR015·AR02·AR05·DPAR

DOSAGES 0.1cc 0.15cc 0.2cc 0.5cc	PRODUCT APPLICATION High-Value Skincare Products, Natural Skincare Products, Serums, Intimate Care Products PRODUCT FEATURES <ul style="list-style-type: none">• Air-blocking function prevents oxidation from air exposure, effectively extending product shelf life• Suitable for high-viscosity products such as creams or sunscreen foundations• Tube-free design with vacuum-driven piston ensures zero residue• 360° dispensing capability• Metal-Free Pathway prevents chemical reactions between product contents and metal, ensuring no contamination
---	--

Adjustable Dosage Airless Pump ARMT05

DOSAGES 0.2cc 0.3cc 0.5cc	PRODUCT APPLICATION Makeup Remover Gel, Foundation, Face Cream PRODUCT FEATURES <ul style="list-style-type: none">• Allowing users to adjust the pump's output volume based on individual needs
---	---

04. Oil Dispensing Pump

Oil Dispensing Pump P02C·P05B·P10A

DOSAGES 0.2cc 0.5cc 1.0cc	PRODUCT APPLICATION Makeup Remover Oil, Hair Oil, Massage Oil PRODUCT FEATURES <ul style="list-style-type: none">• Patented leak-proof structure ensures no leakage during dispensing• The twist-lock actuator prevents accidental dispensing during transportation, reducing the need for plastic caps and providing an eco-friendly solution• Suction-back anti-drip design prevents liquid residue or dripping after use, keeping the actuator clean• Made with PBT high chemical resistance material
---	---

07. Sustainable Pump

All Plastic Pump P02B·AR02B

DOSAGES 0.2cc	PRODUCT APPLICATION Vegan Skincare Products, Eco-Friendly Skincare Products, Natural Organic Skincare Products PRODUCT FEATURES <ul style="list-style-type: none">• Recipient of Taiwan's Outstanding Industrial Innovation Invention Award• Constructed entirely from 100% plastic, free of metal components, enabling full recycling without the need for disassembly• Proven durability through a 3000-actuation lifecycle test (equivalent to dispensing 600ml of liquid)
-------------------------	---

PCR Pump

DOSAGES 0.05cc ~ 1.0cc	PRODUCT FEATURES <ul style="list-style-type: none">• PCR PP material is FDA-certified and verified with the GRS 4.0 recycling report and TÜV Rheinland certification, meeting international sustainability standards while ensuring safety and reliability
----------------------------------	---

POM Free Pump

DOSAGES 0.06cc ~ 0.2cc	PRODUCT FEATURES <ul style="list-style-type: none">• Eco-Friendly Design: POM (Polyoxymethylene)-free material reduces environmental impact, aligning with international sustainability standards
----------------------------------	--
